cycle path

Power to the Pedal!

Our Mission and Vision

Our drive and our destination

We are passionate about **cycling** and passionate about **technology**. Cyclepath is our innovative vehicle to use technology and create an **interactive cycling-mobility platform** that allows:

- **Cyclists** to discover and navigate their urban cycling environment and interact with their urban cycling community
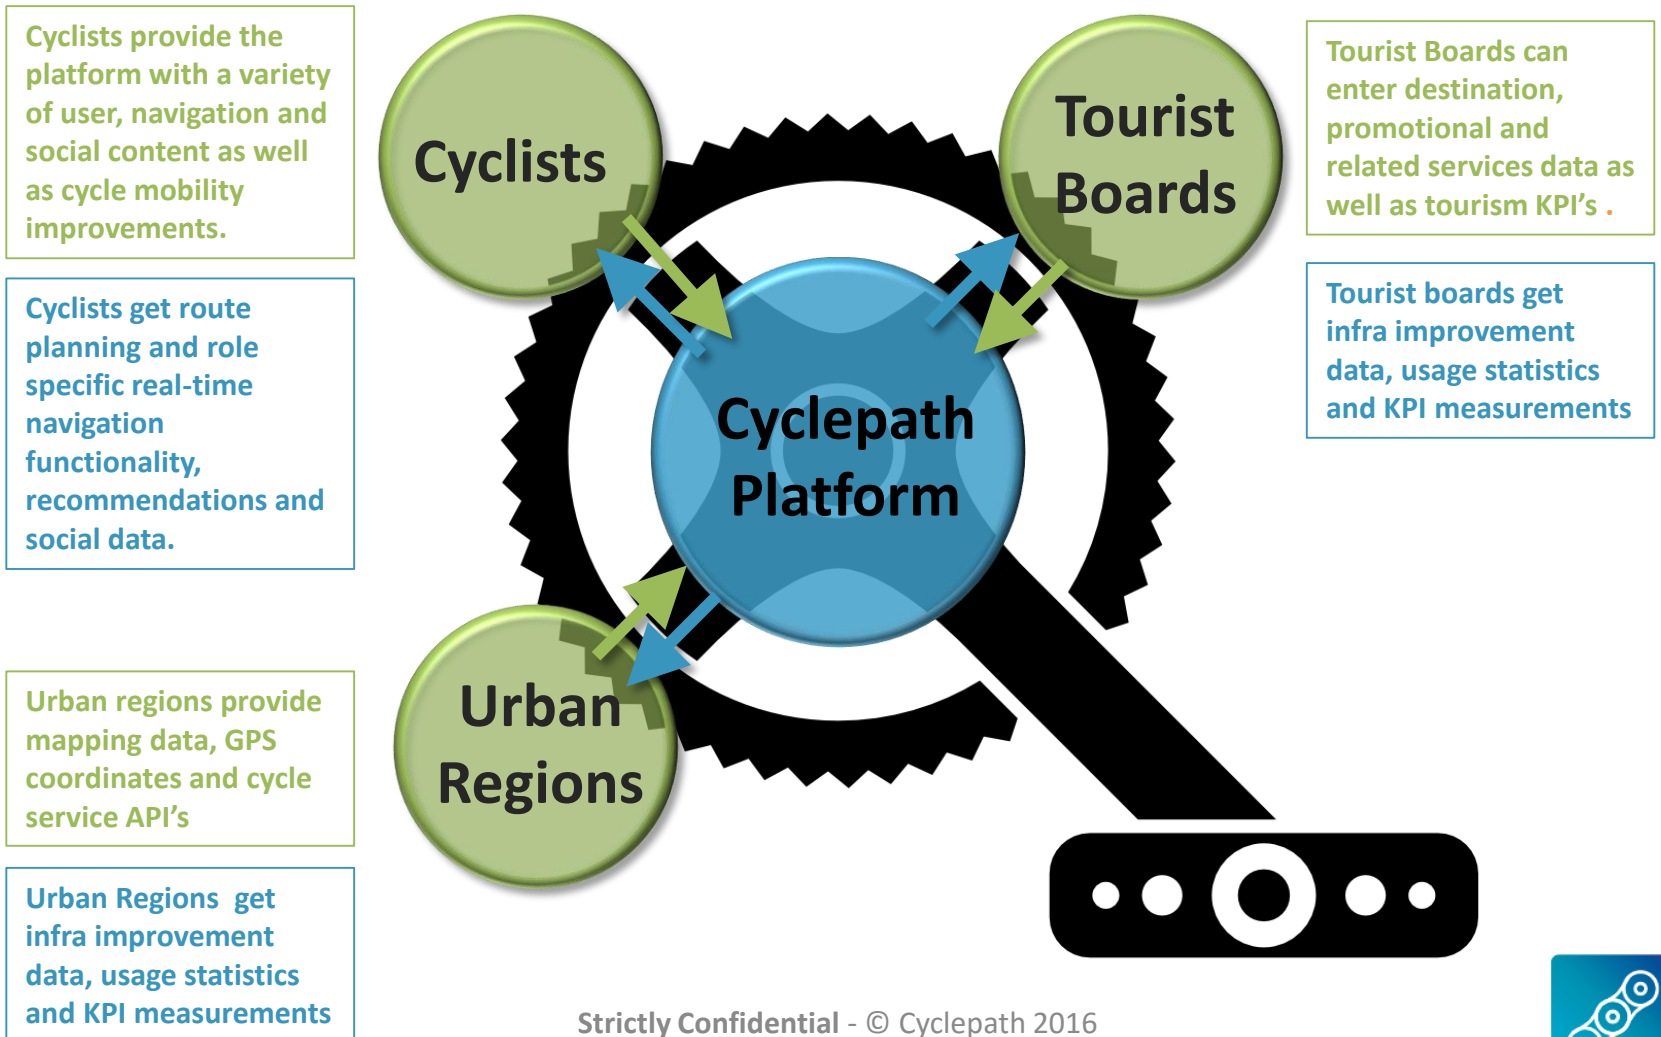

- **Urban regions and Tourism Agencies** to intelligently and measurably boost both tourism related and everyday bicycle use.
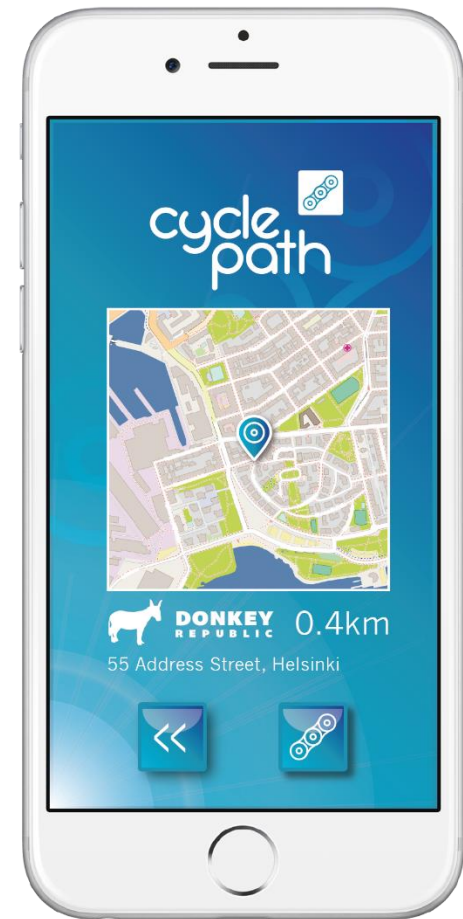

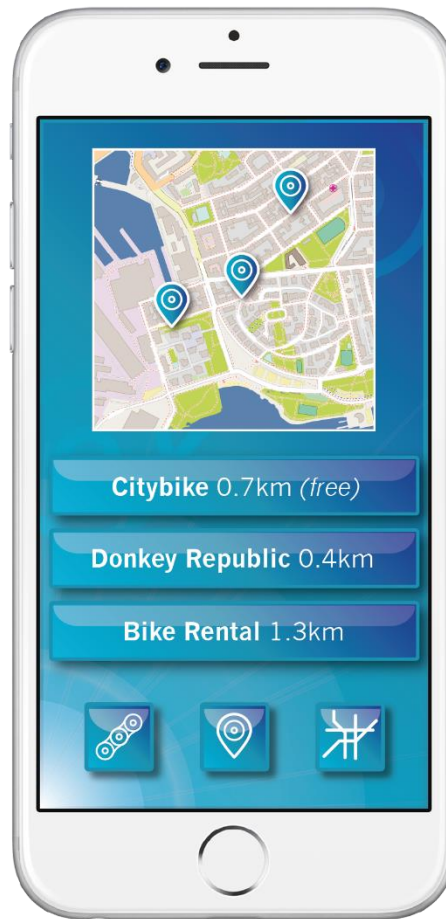

The Cyclepath Platform
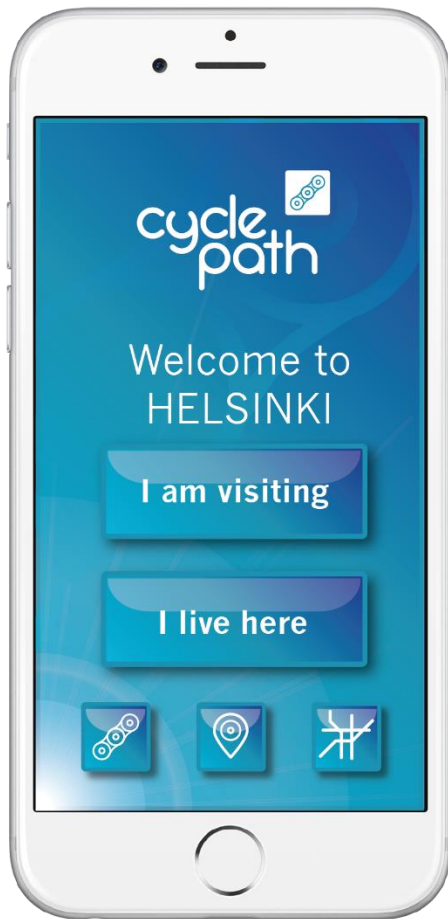

Connecting cycling mobility services

Cyclists provide the platform with a variety of user, navigation and social content as well as cycle mobility improvements.

Cyclists get route planning and role specific real-time navigation functionality, recommendations and social data.

Urban regions provide mapping data, GPS coordinates and cycle service API's

Urban Regions get infra improvement data, usage statistics and KPI measurements
